

Traffic Box Art Design Template: Broadway & Seventh Street

This is a flat template of a typical traffic box showing the front, back and sides; *it is not to scale*. To get a sense for the actual project, visit the box at Broadway and Seventh Street in The District. Official signage on the box cannot be painted over or obscured otherwise. You must use this template to show your basic design concept. Because the selection committee will be reviewing design concepts in their decision making process, you should show the colors that you would use. It is understood that the design may need to be updated or re-worked once selected.
