Clark Lane Non-Motorized Improvement
Clark Lane - from Woodland Springs Court to McKee Street
Interested Parties Meeting
Wednesday, November 6, 2013, 5:30 P.M.

PURPOSE OF TODAY’S MEETING

Thank You for taking time to attend this meeting. This is an informal open house style meeting to inform local residents and other interested persons about the proposed project. This meeting is an opportunity for citizens to ask questions and offer input regarding the proposed project, prior to a formal Public Hearing which will be held by the City Council at a later date.

PROJECT INFORMATION

• This stretch of Clark Lane is classified as a Minor Arterial according to the Columbia Area Transportation Study Organization (CATSO) Major Roadway Plan.

• Project length is approximately 4,300 feet (0.8 miles).

• Concept design includes widening Clark Lane 5 ft. on both sides with full-depth pavement, and restriping the existing 12 ft. lanes to 11 ft. with a 6 ft. wide shoulder on both sides.

• The full-depth pavement will allow the shoulders to serve as future travel lanes with a forthcoming project to improve this stretch of Clark Lane to a complete street with dedicated bicycle lanes and sidewalks.

• Few easements will be needed for construction of this project. This will result in the project being completed approximately 10-12 months earlier than other design concepts.
